1Q18 Commentary

Global equity markets rode a wild roller coaster in the first quarter of 2018. Enthusiasm for recently implemented U.S. tax cuts propelled U.S. equity indices sharply higher early in the quarter. This in turn lifted U.S. interest rates, but was met by a falling U.S. dollar. Domestic market momentum spilled over into shares in emerging markets which rose at near double-digit rates.

Later in the quarter, however, fears of a "global trade war" and concerns about technology company breaches of user data privacy catalyzed a broad sell-off. Many of the global indices, excluding the tech-heavy NASDAQ Composite Index<sup>2</sup>, finished the quarter modestly down.

For the quarter, the S&P 500 Index<sup>2</sup> fell by -0.76% while the NASDAQ Composite Index rose by +2.59%. Meanwhile, the MSCI Euro Index<sup>2</sup> fell by -0.42% and the Nikkei<sup>2</sup> fell by -5.14% (in local currency). The relative underperformance of Europe and Japan reflects the fact that U.S. shares rose much more dramatically early in the quarter.

The MSCI Emerging Markets Index<sup>2</sup> followed a pattern similar to U.S. shares, registering a +1.42% gain for the quarter. Chinese shares fared worse (MSCI China Index<sup>2</sup> fell -1.63% in local currency), no doubt reflecting the announcement of proposed U.S. tariffs on a number of Chinese products, which came late in the quarter.

In terms of market capitalization, small capitalization stocks fared slightly better than large, although performance was almost flat during the quarter as the Russell 1000<sup>2</sup> and Russell 2000<sup>2</sup> indexes posted quarterly returns of -0.69% and -0.08%, respectively. A larger gap of outperformance was present between growth and value stocks as the Russell 1000 Growth<sup>2</sup> and the Russell 1000 Value<sup>2</sup> indexes posted quarterly returns of 1.42% and -2.83%, respectively.

The Marsico Focus Fund posted a return of 6.56% for the first quarter and outperformed its benchmark, the S&P 500 Index, which returned -0.76%.

Primary Contributors<sup>5</sup>:

Stock selection in the Consumer Discretionary sector<sup>8</sup>, one of the strongest-performing sectors of the benchmark index, was the largest driver of performance during the period. The Fund's stock selection and overweight allocation to the strongest-performing sector of the benchmark index, Information Technology sector, also contributed to performance. Stock selection and an underweight allocation to the Consumer Staples sector, one of the weakest sectors of the benchmark index, helped boost performance as well.

Primary Detractors<sup>5</sup>:

Stock selection in the Energy sector was a detractor from performance during the quarter.

Characteristics<sup>5</sup>

The Focus Fund is classified as a non-diversified portfolio, which means it may hold fewer securities than a diversified fund because it is permitted to invest a greater percentage of its assets in a smaller number of securities. Holding fewer securities increases the risk that the value of the Fund could go down because of the poor performance of a single investment. The Fund and the stocks and markets in which it invests are subject to general risks that include volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

<sup>2</sup> The S&P 500 Index is a registered trademark of S&P and is an unmanaged broadly-based index of the common stock prices of 500 large U.S. companies, and includes the reinvestment of dividends. The Russell 1000 Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000 Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership, and includes the reinvestment of dividends. The Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership, and includes the reinvestment of dividends. The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values, and includes the reinvestment of dividends. The Russell 1000 Value Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values, and includes the reinvestment of dividends. The MSCI Emerging Markets (EM) Index captures large and mid-cap representation across 24 Emerging Markets (EM) countries. With 846 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country. The NASDAQ Composite Index is the market capitalization-weighted index of approximately 3,000 common equities listed on the Nasdaq stock exchange. The types of securities in the index include American depositary receipts, common stocks, real estate investment trusts (REITs) and tracking stocks, as well as limited partnership interests. The index includes all Nasdaq-listed stocks that are not derivatives, preferred shares, funds, exchange-traded funds (ETFs) or debenture securities. The MSCI China Index captures large and mid cap representation across China H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs). With 153 constituents, the index covers about 85% of this China equity universe. The MSCI Euro Index captures large cap representation across the 10 Developed Markets countries in the European Monetary Union. With 123 constituents, the index covers approximately 70% of the free float-adjusted market capitalization of the EMU. The Nikkei 225 Stock Average Index is a price-weighted average of 225 top-rated Japanese companies listed in the First Section of the Tokyo Stock Exchange, excluding ETFs, REITs, preferred equity contribution securities, and tracking stocks (on subsidiary dividend) etc. other than common stocks. Sources of foreign exchange rates may be different between a portfolio and the benchmarks. The indexes mentioned above are unmanaged and not available for direct investment. For comparison purposes, it should be noted that the indexes do not charge fees and have no expenses.

<sup>3</sup> Lipper Inc., A Reuters Company, is a nationally recognized organization that measures the performance of mutual funds within a universe of funds that have similar investment objectives. The Lipper Large-Cap Growth Index is an unmanaged index that, by portfolio practice, invests at least 75% of its equity assets in large-cap growth companies. For a complete description of Lipper investment objectives, please see: [www.lipperweb.com](http://www.lipperweb.com).
