Price/Book ⁷ (1 yr. trailing)	9.17
Active Share ¹⁰	77.37

1Q19 Commentary

After a difficult fourth quarter of 2018, the first quarter of 2019 saw a strong reversal of sentiment on the back of two major developments. First, and perhaps most importantly, the Federal Reserve changed course during the quarter and now anticipates only one Federal Funds interest rate increase through 2021, which is a stark contrast to the six interest rate hikes U.S. Federal Reserve Chairman Powell discussed in October during his now infamous "far from neutral" speech. Second, there are early indications that China's aggressive stimulus efforts are working and contributing to a stabilization of economic conditions. When combined with improved prospects for a comprehensive U.S./China trade deal, the markets appear to anticipate an overall improvement in the Chinese landscape. On a company-specific level, the holdings in the Fund generally reported strong fourth-quarter earnings during the first quarter, and our strategy of finding companies that can grow in various economic environments remains our main focus.

For the quarter, the S&P 500 Index gained +13.65% and the NASDAQ Composite Index² gained +16.81%. Japan's Nikkei 225 Index² rose +6.70% (in local currency). Equities in Europe and China followed suit as the MSCI Euro Index² was up +9.80% and the MSCI China Index² returned +17.69%. The MSCI Emerging Markets Index² gained +9.91%.

In terms of market capitalization, small capitalization stocks fared slightly better than large capitalization stocks during the quarter as the Russell 1000^{2,3} and Russell 2000^{2,3} indexes posted quarterly returns of +14.00% and +14.58%, respectively. A larger gap of outperformance was present between growth and value stocks as the Russell 1000 Growth^{2,3} and the Russell 1000 Value^{2,3} indexes posted quarterly returns of +16.10% and +11.93%, respectively.

The Marsico Focus Fund posted a return of +15.89% for the first quarter and outperformed its benchmark, the S&P 500 Index, which returned +13.65%.

Primary Contributors⁶:

Stock selection in the Communication Services, Health Care and Consumer Discretionary sectors⁹ had the largest impact on performance in the quarter. An overweight allocation to the strongest-performing sector of the benchmark index, Information Technology, also boosted returns. An underweight allocation and stock selection in the Financials sector contributed to performance as well.

Primary Detractors⁶:

As the benchmark index gained more than +13% in the quarter, the Fund incurred an opportunity cost by maintaining a slightly elevated allocation to cash and cash equivalents (the Fund maintained a 4% average weight in cash and cash equivalents). The Fund had no exposure to the stronger-performing sectors, Energy and Real Estate, which dampened returns.

Top 5 Holdings⁶

	% of Fund
Visa, Inc. - Cl. A	7.19%
PayPal Holdings, Inc.	6.74%
Alphabet, Inc. - Cl. A	6.37%
Amazon.com, Inc.	6.14%

Hypothetical Growth of \$10,000^{1,6} Since Inception: 12/31/1997

The Focus Fund is classified as a non-diversified portfolio, which means it may hold fewer securities than a diversified fund because it is permitted to invest a greater percentage of its assets in a smaller number of securities. Holding fewer securities increases the risk that the value of the Fund could go down because of the poor performance of a single investment. The Fund and the stocks and markets in which it invests are subject to general risks that include volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

² The S&P 500 Index is a registered trademark of S&P and is an unmanaged broadly-based index of the common stock prices of 500 large U.S. companies, and includes the reinvestment of dividends. The Russell 1000 Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000 Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership, and includes the reinvestment of dividends. The Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership, and includes the reinvestment of dividends. The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values, and includes the reinvestment of dividends. The Russell 1000 Value Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values, and includes the reinvestment of dividends. The NASDAQ Composite Index is the market capitalization-weighted index of approximately 3,000 common equities listed on the Nasdaq stock exchange. The types of securities in the index include American depositary receipts, common stocks, real estate investment trusts (REITs) and tracking stocks, as well as limited partnership interests. The index includes all Nasdaq-listed stocks that are not derivatives, preferred shares, funds, exchange-traded funds (ETFs) or debenture securities. The Nikkei 225 Stock Average Index is a price-weighted average of 225 top-rated Japanese companies listed in the First Section of the Tokyo Stock Exchange, excluding ETFs, REITs, preferred equity contribution securities, and tracking stocks (on subsidiary dividend) etc. other than common stocks. The MSCI Euro Index captures large cap representation across the 10 Developed Markets countries in the EMU. With 123 constituents, the index covers approximately 70% of the free float-adjusted market capitalization of the EMU. The MSCI China Index captures large and mid cap representation across China H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs). With 153 constituents, the index covers about 85% of the China equity universe. The MSCI Emerging Markets (EM) Index captures large and mid-cap representation across 24 Emerging Markets (EM) countries. With 846 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country. Sources of foreign exchange rates may be different between a portfolio and the benchmarks. The indexes mentioned above are unmanaged and not available for direct investment. For comparison purposes, it should be noted that the indexes do not charge fees and have no expenses.
