Active Share ¹⁰	96.08

Objective and Strategy

The Marsico 21st Century Fund's goal is to seek long-term growth of capital. The 21st Century Fund is a "diversified" portfolio and invests primarily in common stocks that are selected for their long-term growth potential. The Fund may invest in companies of any size, including large-, medium-, or small-capitalization companies, depending on the portfolio manager's view of market conditions. Under current market conditions the portfolio manager expects to invest substantially in medium-capitalization companies. The Fund will normally hold a core position of between 35 and 60 common stocks.

Period	Rating	Funds in Category
Overall	★★	556 funds
Three Year	★★★	556 funds
Five Year	★★★★	486 funds
Ten Year	★	357 funds

Based on risk-adjusted return through 1/31/2018 in the US Fund Mid-Cap Growth Category.

The 21st Century Fund and the stocks and markets in which it invests are subject to general risks that include volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

² The S&P 500 Index is a registered trademark of S&P and is an unmanaged broadly-based index of the common stock prices of 500 large U.S. companies that includes the reinvestment of dividends. The Russell Midcap Growth Index (the "Underlying Index") measures the performance of the mid-capitalization growth sector of the U.S. equity market, and is composed of mid-capitalization U.S. equities that exhibit growth characteristics. It is a subset of the Russell Midcap® Index, which measures the performance of the mid-capitalization sector of the U.S. equity market. The Underlying Index measures the performance of equity securities of Russell Midcap Index issuers with higher price-to-book ratios and higher forecasted growth.

³ Lipper Inc., A Reuters Company, is a nationally recognized organization that measures the performance of mutual funds within a universe of funds that have similar investment objectives. The Lipper Multi-Cap Growth Index is an equal dollar weighted index of the largest mutual funds within the Multi-Cap Growth fund classification, as defined by Lipper. The index is adjusted for the reinvestment of capital gains and income dividends. For a complete description of Lipper investment objectives, please see: www.lipperweb.com.

MSCI, S&P, MCM and any of their affiliates or third parties involved in compiling GICS shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

⁹ The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©Morningstar, Inc.
