Objective and Strategy

The Marsico Focus Fund's goal is to seek long-term growth of capital. The Focus Fund is a "non-diversified" portfolio and invests primarily in the common stocks of large companies that are selected for their long-term growth potential. The Focus Fund will normally hold a core position of between 20 and 35 common stocks.

<sup>1</sup> As of 9/30/2018, the Marsico Focus Fund's average annualized returns for the one-year, five-year, ten-year and since inception periods were 21.78%, 13.17%, 11.48% and 8.79% respectively. Performance data quoted represents past performance. Investment return and principal will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance information quoted. To obtain the Fund's performance current to the most recent month-end, please visit [www.marsicofunds.com](http://www.marsicofunds.com) or call 888-860-8686. A Fund's performance, especially for short time periods, should not be the sole factor in making an investment decision.

Please consider the Fund's investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contains this and other information about the Fund, call 888-860-8686 or visit [www.marsicofunds.com](http://www.marsicofunds.com). Please read the prospectus carefully before investing.

Lipper Quartile Rank<sup>4</sup> as of 10/31/2018

Period	Quartile	Ranking
Inception	1	14 out of 73
One Year	4	151 out of 173
Three Year	4	142 out of 162
Five Year	4	134 out of 156
Ten Year	4	121 out of 138

Based on total return through 10/31/2018 in the Large-Cap Growth Funds Category.

Morningstar Ratings<sup>10</sup> as of 10/31/2018

Period	Rating	Funds in Category
Overall	★★	1253 funds
Three Year	★★	1253 funds
Five Year	★★	1120 funds
Ten Year	★★	811 funds

Based on risk-adjusted return through 10/31/2018 in the US Fund Large Growth Category.

The Focus Fund is classified as a non-diversified portfolio, which means it may hold fewer securities than a diversified fund because it is permitted to invest a greater percentage of its assets in a smaller number of securities. Holding fewer securities increases the risk that the value of the Fund could go down because of the poor performance of a single investment. The Fund and the stocks and markets in which it invests are subject to general risks that include volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

<sup>2</sup> The **S&P 500 Index** is a registered trademark of S&P and is an unmanaged broadly-based index of the common stock prices of 500 large U.S. companies that includes the reinvestment of dividends. **The Russell 1000 Growth Index** measures the performance of the large cap growth segment of the largest 1000 U.S. companies, based on total market capitalization, higher price-to-book ratios and higher forecasted growth values, and includes the reinvestment of dividends. The indexes described above are unmanaged and are not available for direct investment. For comparison purposes, it should be noted that the indexes described above do not charge fees and have no expenses.

MSCI, S&P, MCM and any of their affiliates or third parties involved in compiling GICS shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

<sup>10</sup> The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©Morningstar, Inc.
