Objective and Strategy

The Marsico International Opportunities Fund's goal is to seek long-term growth of capital. The International Opportunities Fund is a "diversified" portfolio and invests primarily (no less than 65% of its total assets) in common stocks of foreign companies that are selected for their long-term growth potential. The Fund may invest in an unlimited number of companies of any size throughout the world.

Morningstar Ratings⁹ as of 10/31/2018

Period	Rating	Funds in Category
Overall	★★★★	358 funds
Three Year	★★★★	358 funds
Five Year	★★★★	324 funds
Ten Year	★★	235 funds

Based on risk-adjusted return through 10/31/2018 in the US Fund Foreign Large Growth Category.

Foreign investments may be riskier than U.S. investments for various reasons including, without limitation, unstable political and economic conditions, currency fluctuations, controls on investment and currency, government control over some issuers, taxation, potential nationalization, sovereign solvency issues, lack of company information, less liquid and more volatile markets, and other factors. In addition, the Fund and the stocks and markets in which it invests are subject to other general risks that include: volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

The Fund may at times experience higher-than-average portfolio turnover which may generate significant taxable gains and increased trading expenses which in turn may lower the fund's return.

² The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. Sources of foreign exchange rates may be different between the Fund and the benchmark. The MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. Sources of foreign exchange rates may be different between the Fund and the benchmark. The indexes described above are unmanaged and not available for direct investment. For comparison purposes, it should be noted that the indexes described above do not charge fees and have no expenses.

³ Lipper Inc., a Reuters Company, is a nationally recognized organization that measures the performance of mutual funds within a universe of funds that have similar investment objectives. The Lipper International Multi-Cap Growth Index is an equal dollar weighted index of the largest mutual funds within the International Multi-Cap Growth fund classification, as defined by Lipper. The index is adjusted for the reinvestment of capital gains and income dividends. For a complete description of Lipper investment objectives, please see: www.lipperweb.com.

⁴ As of the Fund's 1/31/18 prospectus; 1.79% gross, 1.50% net. Marsico Capital Management, LLC, the investment adviser to the Fund (the "Adviser"), has entered into a written expense limitation and fee waiver agreement under which it has agreed to limit the total expenses of the International Opportunities Fund (excluding taxes, interest, acquired fund fees and expenses, litigation, extraordinary expenses, brokerage and other transaction expenses relating to the purchase or sale of portfolio investments) to an annual rate of 1.50% of the Fund's average net assets until January 31, 2019. This expense limitation and fee waiver agreement may be terminated by the Adviser at any time after January 31, 2019 upon 15 days prior notice to the Fund and its administrator, provided that no such modification will be made in a manner inconsistent with the terms of the current prospectus. The Adviser may recoup from the Fund fees previously waived or expenses previously reimbursed by the Adviser with respect to that Fund pursuant to this agreement (or a previous expense limitation agreement) if: (1) such recoupment by the Adviser does not cause the Fund, at the time of recoupment, to exceed the lesser of (a) the expense limitation in effect at the time the relevant amount was waived and/or reimbursed, or (b) the expense limitation in effect at the time of the proposed recoupment, and (2) the recoupment is made within three years after the fiscal year end date as of which the amount to be waived or reimbursed was determined and the waiver or reimbursement occurred.

⁹ The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©Morningstar, Inc.
