Fund Expenses for the Past Year

(Based on a hypothetical $10,000 investment)

Fund (Class)	Costs of a $10,000 investment	Costs paid as a percentage of a $10,000 investment
Global Fund (Investor Class/MGLBX)	$156	1.34%

Management's Discussion of Fund Performance

SUMMARY OF RESULTS

For the fiscal year ended September 30, 2025, the Fund's Investor Class shares posted a total return of (US $) +33.45%, compared to its benchmark index, the MSCI All Country World® Index, which had a total return of (US $) +17.27% over the same period. Below, we discuss some of the effects of the Fund's investment allocation on its performance as compared to the MSCI All Country World® Index, as well as the Fund's top stock contributors and detractors. The Fund is not managed to track a benchmark index and may hold a substantially overweight or underweight position in a sector, industry, or security when compared to a benchmark.

TOP PERFORMANCE CONTRIBUTORS

» Investment Allocations | The Fund's outperformance, as compared to the MSCI All Country World® Index, can primarily be attributed to strong stock selection in the Industrials, Communication Services, and Information Technology sectors, as defined in the Global Industry Classification Standard. Additionally, an underweight allocation to the weakest performing sector of the benchmark index, Health Care, and an overweight allocation to the strongest performing sector of the benchmark index, Communication Services, boosted relative performance results.

» Rolls-Royce Holdings PLC ("Rolls-Royce") | Rolls-Royce is a global engineering company which, among its other product lines, designs and manufactures aircraft engines and power systems. The company's earnings strengthened as civil aerospace flying hours recovered sharply and defense demand remained resilient.

» GE Vernova, Inc. ("GE Vernova") | GE Vernova is a leading provider of power generation and grid technologies, spanning gas, wind, and electrification systems. GE Vernova's earnings results improved based on surging orders tied to its data center and artificial intelligence buildouts, which created backlogs of demand for its products, combined with generally strong demand for its renewable energy and grid modernization technologies.

TOP PERFORMANCE DETRACTORS

» Investment Allocations | Weak stock selection in the Consumer Discretionary, Health Care, and Financials sectors had a negative effect on performance relative to the benchmark index. An underweight allocation to the strong performing Financials sector created a further drag on performance.

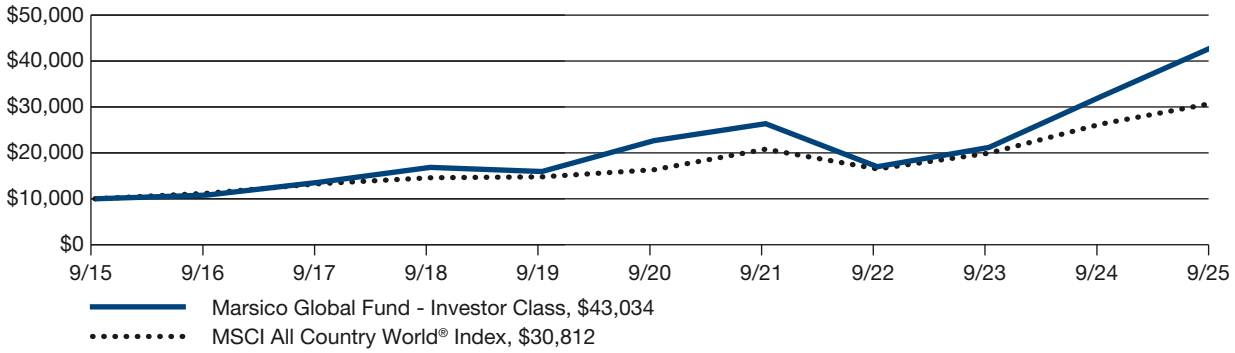

» Novo Nordisk A/S – Cl. B ("Novo Nordisk") | Novo Nordisk is a global pharmaceutical company specializing in diabetes care, obesity treatments, and rare diseases. The company's stock price came under pressure as investors questioned the durability of GLP-1 pricing power and increasing competition. Given these pressures, we sold the position.

» The Goldman Sachs Group, Inc. ("Goldman Sachs") | Goldman Sachs is a global investment bank providing services in trading, investment banking, and asset management. Results were hampered by weaker capital markets activity, including subdued IPO issuance and lower advisory revenues.

Fund Performance

The following graph and table compare the performance data of the Investor Class shares of the Fund for the most recently completed 10 fiscal years to the performance data of a broad-based index over the same periods. All indices are unmanaged and investors cannot invest directly in an index. The graph and table below assume reinvestment of dividends and capital gain distributions and do not reflect the deduction of taxes that a shareholder would pay on dividends and capital gain distributions or the redemption of fund shares. The graph assumes an initial investment of $10,000.

GROWTH OF $10,000

AVERAGE ANNUAL TOTAL RETURNS *(for the periods ended 09/30/2025)*	1 Year	5 Years	10 Years
Global Fund (Investor Class/MGLBX)	33.45%	13.69%	15.71%
MSCI All Country World® Index	17.27%	13.54%	11.91%

The Morgan Stanley Capital International All Country World Index ("MSCI All Country World® Index") is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

Performance data quoted above represents past performance, and past performance is not a guarantee of future results. *The performance results above reflect any applicable expense waivers or reimbursements in effect during the periods shown, without which the performance returns reflected would have been reduced. In accordance with the expense limitation and fee waiver agreement, Marsico Capital Management, LLC ("Adviser") may recoup fees and expenses previously waived or reimbursed under certain parameters. Recoupment of previously waived fees and expenses or reimbursements results in lower performance returns. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.*
