

## INVESTMENT IDEA

## MARSICO INTERNATIONAL OPPORTUNITIES FUND

(MIOFX/MIIOX)

## 3 Reasons to Consider the Marsico International Opportunities Fund

## 1 International Opportunity Fueled By Game-Changing Themes

Unprecedented advances in digital technology and a rapidly emerging middle class worldwide are just two of the compelling catalysts driving growth across the globe. The Marsico International Opportunities Fund (the "Fund") seeks to capitalize on the opportunities provided by many game-changing, long-term, secular, global themes, including:

- » **Digital Transformation:** The ongoing digitization of business processes, along with consumer demand to engage on digital platforms, has allowed companies to create new business models and disrupt traditional ones. For example, this theme includes e-commerce, payment systems, mobile gaming, and even electric vehicles.
- » **The Global Emerging Middle Class:** Growing wealth and spending power of consumers around the world is fueling demand for goods and services ranging from travel and luxury goods to housing and financial services.
- » **Life Sciences Innovations:** Advances in diagnostic tools and innovative treatments have improved the quality of life for many, creating a virtuous cycle with care for the aging, as life expectancies on a global basis increase.

## 2 An Alpha-Generating Complement To An International Allocation

Innovative international companies with dominant market positions are the foundation of this growth strategy. The portfolio managers scour the world for what they believe to be the most compelling, high-quality opportunities for inclusion in the Fund.

By investing in larger, high-quality, industry-leading companies, this performance-oriented Fund potentially serves as an excellent complement to an investor's broader international allocation.

### 3 An Emphasis On High-Quality Growth Companies

For the investment team at Marsico Capital Management, LLC, the adviser to the Fund, it's about company first and not the country of domicile. Sector agnostic, the Fund is comprised of what the portfolio managers believe to be high-quality large-cap companies with global revenue streams, excellent management teams, strong brand franchises, and attractive and growing markets. The portfolio is informed by a blend of the adviser's top-down macroeconomic analysis and early identification of long-term secular themes with bottom-up stock selection.

### About The Adviser

Founded in 1997, Marsico Capital Management, LLC, the investment adviser to the Marsico Funds, employs a high-conviction approach to the management of a select suite of growth-oriented domestic and international equity portfolios. Headquartered in Denver, Colorado, the firm managed approximately \$2.8 billion in assets as of December 31, 2023.

The firm's founder, Tom Marsico, has over 40 years of experience in the investment management industry and is one of the industry's first managers to successfully implement high-conviction, concentrated portfolios.

Performance data quoted throughout represents past performance. Investment return and principal will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance information quoted. To obtain the Fund's performance current to the most recent month-end, please visit [marsicofunds.com](https://marsicofunds.com) or call 888-860-8686. The Fund's performance, especially for short time periods, should not be the sole factor in making an investment decision.

## Important Information

*Please consider the Fund's investment objectives, risks, charges, and expenses carefully before investing. To obtain a prospectus, which contains this and other information about the Fund, call 888-860-8686 or visit marsicofunds.com. Please read the prospectus carefully before investing.*

Investments in foreign securities generally, and emerging markets in particular, involve risks that may differ from or at times exceed the risks of U.S. investments for a variety of reasons such as, without limitation, unstable international, regional, or national political and economic conditions, diplomatic developments such as sanctions, embargoes, trade tariffs, trade limitations or trade wars, less stringent investor protections and disclosure standards, currency fluctuations, foreign controls on investment and currency exchange, foreign governmental control of some issuers, potential confiscatory taxation or nationalization of companies by foreign governments, sovereign solvency considerations, withholding taxes, a lack of adequate company information, less liquid and more volatile exchanges and/or markets, ineffective or detrimental government regulation, varying accounting, auditing, disclosure, and reporting standards, political or economic factors that may severely limit business activities, legal systems or market practices that may permit inequitable treatment of minority and/or non-domestic investors, immature economic structures, and less developed and more thinly traded securities markets. In addition, the Fund and the stocks and markets in which it invests are subject to other general risks that include unforeseen events such as pandemics, volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

<sup>2</sup> The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. © 2024 Morningstar, Inc.
