Important Information

Please consider the Fund's investment objectives, risks, charges, and expenses carefully before investing. To obtain a prospectus, which contains this and other information about the Fund, call 888-860-8686 or visit marsicofunds.com. Please read the prospectus carefully before investing.

The Marsico Midcap Growth Focus Fund and the stocks and markets in which it invests are subject to general risks that include unforeseen events such as pandemics, volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

¹ Source: Morningstar, Mid-Cap Growth Funds Category.

² The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. © 2024 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The Fund received 2 stars for the 3-year period and 3 stars for the 5- and 10-year periods ended 12/31/2023 among 523, 492, and 395 Mid-Cap Growth funds, respectively. Past performance is no guarantee of future results. Recent performance may have been negative.

³ Performance data and Morningstar data available for the Institutional Class is limited because the Institutional Class commenced operations on December 6, 2021.

⁵ The Russell Midcap Growth Index (the "Underlying Index") measures the performance of the mid-capitalization growth sector of the U.S. equity market, and is composed of mid-capitalization U.S. equities that exhibit growth characteristics including higher price-to-book ratios and higher forecasted growth. It is a subset of the Russell Midcap® Index, which measures the performance of the mid-capitalization sector of the U.S. equity market. The index described above is unmanaged and not available for direct investment. For comparison purposes, it should be noted that the index described above does not charge fees and has no expenses.

⁷ As of the Fund's 1/31/2023 prospectus, as supplemented; Investor Class 1.35% gross/net; Institutional Class 1.12% gross/net.

⁸ Source: UMB Fund Services, Inc., FactSet, and Marsico Capital Management, LLC ("MCM"). Data shown such as portfolio holdings, percentages, country, and sector weightings generally applied on the date shown above, and may have changed substantially since then. Please keep in mind that our views on investments shown above are subject to change at any time, and the holdings represented here do not represent all of the securities purchased, sold, or recommended by MCM. References to specific securities mentioned herein, which may change due to the active management of the Fund, are not to be construed as a recommendation to buy or sell those securities, and should not be assumed to be or have been profitable investments, and are not guaranteed to be in the Fund today.

⁹ Sector weightings for portfolios are determined using the Global Industry Classification Standard ("GICS"). GICS was developed by and is the exclusive property and service mark of MSCI Inc. ("MSCI") and Standard & Poor's ("S&P") and is licensed for use by MCM. Neither MSCI, S&P nor MCM or any third party involved in compiling GICS makes any express or implied warranties or representations with respect to such standard or classification (or the results from use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, and fitness for a particular purpose with respect to any of such standard or classification. MSCI, S&P, MCM and any of their affiliates or third parties involved in compiling GICS shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

¹⁰ References to historical performance represents the Investor Class shares, which was the only class of shares available for purchase during the relevant period.

¹¹ Risk measures based on monthly return calculation against the S&P 500 Index. Capture Ratio measures the percentage of index (market) performance an investment "captured" during periods when the index achieved gains (up capture) or declined (down capture). For example, a capture ratio of 100 means investment performance went up or down exactly the same amount as the index. Sharpe Ratio measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. For example, a higher ratio means better return per unit of risk.
