MARSICO FOCUS FUND

(MFOCX/MIFOX)

A High-Conviction, Concentrated Growth Portfolio

The Marsico Focus Fund (the "Fund") is a high-conviction, performance-oriented equity portfolio that invests in dynamic, secular growth themes. The Fund features a concentrated portfolio normally comprised of 20-35 of what Marsico Capital Management, LLC ("Marsico"), the adviser to the Marsico Funds, believes to be high-quality large-cap companies with strong business fundamentals that are managed by innovative teams for long-term growth.

The portfolio is co-managed by Tom Marsico, one of the industry's first managers to successfully implement high-conviction, concentrated portfolios, along with Peter Marsico and Jimmy Marsico. The portfolio managers seek to capture compelling growth opportunities through the early identification of long-term secular themes combined with rigorous fundamental research. Since the Fund's⁴ inception on December 31, 1997, it has outperformed both the S&P 500 Index⁵ and Russell 1000 Growth Index^{5,6} as of June 30, 2023.⁷

"Rigorous research and a focus on high quality inform our time-tested approach to providing attractive risk-adjusted returns through a high-conviction, concentrated equity portfolio."

Differentiated Three-Pronged Approach To Capturing Growth

The investment team at Marsico has identified and differentiated growth companies into three categories in their dynamic portfolio construction process. The growth characteristics of the Fund's portfolio companies place them into one of the three following types:

1. Core Growth Companies:

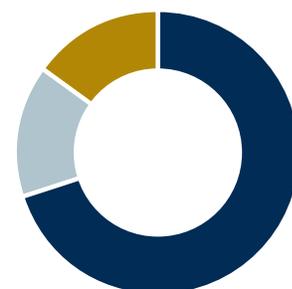

Well-established companies with the potential for attractive, sustained growth and relatively predictable future earnings growth rates.

- » The Fund typically allocates 60-75% of the portfolio to these companies.

2. Aggressive Growth Companies: Faster-growing companies that offer innovative and disruptive products or services with the potential to produce rapid earnings growth.

- » The Fund typically allocates up to 25% of the portfolio to these companies.

Growth Categories

■ Core (60% - 75%)
■ Aggressive (0% - 25%)
■ Life Cycle Change (0% - 25%)

Fund Facts

As of 6/30/2023

Holdings: 20

3. Life Cycle Change Companies: These companies are undergoing positive transformational changes in their business models, such as a change in management, product line, or acquisition that potentially serves as a catalyst for future earnings growth.

- » The Fund typically allocates up to 25% of the portfolio to these companies.

The portfolio managers take a flexible allocation approach to these types of companies based on relative market opportunities.

A Rigorous, Multi-Faceted Approach Drives Marsico's Selection Process

Within these three growth categories, portfolio holdings are selected based upon various quantitative and qualitative factors that distinguish the portfolio:

- » Excellent Management Teams
- » Strong Brand Franchise
- » Superior Size/Scale Characteristics
- » Positive and Transformative Catalysts
- » Attractive Operating and Cash Flow Metrics
- » Strong, Conservative Balance Sheets

Harnessing The Power Of Compelling Themes

Some of the game-changing, long-term secular themes that drive the Fund's portfolio discovery process include:

- » **Digital Transformation:** The rapid digitization of all types of activities and processes, ranging from e-commerce, digital marketing, and social media networking, to new software services and automation of industrial plants.
- » **Global Emerging Middle Class:** The growing wealth and spending power of emerging and developing market consumers translate into new and expanding market opportunities for dominant, market-leading companies.
- » **Life Sciences Innovations:** Advances in the sciences and computing power are leading to new opportunities in diagnostic tools, disease-modifying therapies, robotic surgeries, and innovative services like tele-medicine.

A Performance-Oriented Complement To Core

Participation in these themes through market-leading and innovative large-cap companies potentially provides investors with a performance-oriented, high-quality growth complement to a core equity portfolio.

Marsico Focus Fund Performance (As of 6/30/2023)⁷

	Average Annualized Returns					
	1 Year	3 Year	5 Year	10 Year	Since Inception 12/31/1997*	Since Inception 12/6/2021*

Performance data quoted throughout represents past performance. Investment return and principal will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance information quoted. To obtain the Fund’s performance current to the most recent month-end, please visit marsicofunds.com or call 888-860-8686. The Fund’s performance, especially for short time periods, should not be the sole factor in making an investment decision.

Important Information

Please consider the Fund’s investment objectives, risks, charges, and expenses carefully before investing. To obtain a prospectus, which contains this and other information about the Fund, call 888-860-8686 or visit marsicofunds.com. Please read the prospectus carefully before investing.

The Marsico Focus Fund is classified as a non-diversified fund, which means it may hold fewer securities than a diversified fund because it is permitted to invest a greater percentage of its assets in a smaller number of securities. Holding fewer securities increases the risk that the value of the Fund could go down because of the poor performance of a single investment. The Fund and the stocks and markets in which it invests are subject to general risks that include unforeseen events such as pandemics, volatility and instability, periods of cyclical change and decline, that investors may at times avoid investments in equity securities, and that the investment adviser may select investments for the Fund that do not perform as anticipated.

² Performance data and Morningstar data available for the Institutional Class is limited because the Institutional Class commenced operations on December 6, 2021.

³ The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©Morningstar, Inc.
